

SHERWIN-WILLIAMS®

Umwelt / Environment

Unsere Umweltbewusstseins entwickelt sich stetig weiter da wir dazulernen, und wir arbeiten aktiv daran, die Auswirkungen unserer Produkte und unserer Unternehmensaktivitäten auf die Umwelt zu minimieren.
Our environmental profile continually evolves as we learn more, and we are actively reducing the impact of our products and operations on the environment.

Sherwin-Williams Umwelt-Profil wird durch eine dynamische Forschungs-und Entwicklungspolitik getrieben. Wir benutzen weniger Lösungsmittel in unseren Produkten, stattdessen bieten wir neue Technologien, die es uns und unseren Kunden erlauben, umweltbelastende Emissionen zu reduzieren.
Sherwin-Williams environmental profile is driven by a dynamic research and development policy. We are using less solvents in our products, while promoting new technology that helps us and our customers to reduce harmful emissions.

Natürlich sind eindeutig dokumentierte Informationen wesentlich für die Umweltpolitik, und auch hier ist Sherwin-Williams eine aktive, verlässliche und kompetente Firma, welche allen gesetzlichen Vorschriften entspricht.
Of course, reporting and clear-cut information are intrinsic to any environmental policy and here too Sherwin-Williams is a proactive, reliable and competent company which complies in full with environmental legislation.

Unseren Kunden, Händlern und auch anderen Interessenten, stellen wir selbstverständlich gerne, übersichtliches und einschlägiges Informationsmaterial über unsere umweltbewusste Arbeit zur Verfügung.
For our customers, authorities and other stakeholders, we are always happy to provide transparent and pertinent information regarding our work with the environment.

Arbeiten mit Respekt vor der Umwelt / *Working with respect for the environment*

Umweltfreundliche Systeme / Environmentally adapted systems

In enger Zusammenarbeit mit unseren Kunden entwickeln wir umweltfreundliche und wirtschaftliche Oberflächensysteme.
Working closely with our customers, we are continually developing solutions that help keep our environment clean and make commercial sense.

Dabei spielen wässrige Systeme eine immer größere Rolle. Durch die Kombination wässriger Systeme mit UV-Härtung entstehen Oberflächen in höchster, lang-lebiger Qualität.
Waterborne solutions feature in an increasing number of our systems, while our other wood finishing alternatives are more environment compliant. And by combining waterborne systems with UV curing we are making the highest quality and durable finishes possible.

How Sherwin-Williams is dealing with REACH

Dear Customer,

REACH is the acronym for '**R**egistration, **E**valuation, **A**uthorisation and **R**estriction of **C**hemicals.' The main objective of this EU regulation ((EC) 1907/2006) is to register chemical substances, evaluate them and authorise or in some cases restrict them.

The implementation of REACH, which has implications for every EU business, will impact all substances in the coming years. We at Sherwin-Williams, being a global leader in the wood finishing industry, would like to assure our customers that we are aware of the challenges and are proactively working on solutions.

As part of meeting the challenge of this regulation we at Sherwin-Williams Sweden have appointed a REACH co-ordinator who will deal with all our internal and external work related to REACH.

Our primary goal is to continue our service to you, our customers and support you with the products you need now and in the future. Since we, like you, are classified as '*downstream users*' of substances, we are cooperating with our raw material suppliers to ensure that they fulfil all the requirements of REACH in terms of pre-registration and registration, so that we can continue to supply the solutions you require now and in the future. **We are fulfilling all the requirements of REACH.**

For more information on REACH, we suggest you access the website of the European Chemicals Agency, <http://ec.europa.eu/echa/>

If you have any further questions or should you require any further information, please do not hesitate to contact us via our dedicated e-mail: Sweden.regulatory@sherwin.com

Yours faithfully,

Camilla Wiberg
Director Regulatory Affairs, EMEA
